************************************ TABLE VI: COMPOSITE-STR. GEOM., HYDR., & MET. MERGED ************************************
    BEGIN FINAL HYDROLOGY, STREAM GEOMETRY, ANDLOCAL METEOROLOGY VERIFICATION FOR THE COMPOSITE NETWORK. THE PURPOSE OF
 THIS PROGRAM IS TO:
       (1) GENERATE THE SOLAR DATA;
       (2) GENERATE THE SHADE DATA;
       (3) DETERMINE THE LOCAL METEOROLOGY FOR EACH NODE;
       (4) COMPLETE THE HYDROLOGY DATA AT EACH NON-HYDROLOGY NODE;
       (5) MERGE ALL DATA AT EACH COMPOSITE NODE FOR ALL YEARS AND TIME PERIODS INTO A SINGLE DIRECT-ACCESS FILE.
 THIS VERIFICATION IS A TRUNCATED VERSION CONTAININGTHE NEWLY CREATED DATA FOR 'KMERGE'.

NORMAL COMPLETION OF 'METROL'.

```
****************************************** TABLE VIII: WATER TEMPERATURE DATA ******************************************
    BEGIN INSTREAM WATER TEMPERATURE CALCULATIONS VERIFICATION OF 'NETWRK' PROGRAM. THE PURPOSE OF THIS PROGRAM IS TO:
       (1) DETERMINE THE PREDICTED WATER TEMPERATURE FOR EACH YEAR & TIME PERIOD AT EVERY NODE IN THE COMPOSITE NETWORK;
       (2) GENERATE THE VERIFICATION TABLE;
       (3) GENERATE THE UNFORMATTED OUTPUT FILE FOR THE OUTPUT REPORT GENERATOR AND/OR LINKAGE TO OTHER PROGRAMS.
 THIS VERIFICATION IS THE FORMATTED VERSION OF 'KTRNSPT' FILE.

**************************************** TABLE I: STREAM GEOMETRY AFTER 'M' NODES MERGED ****************************************
   BEGIN STREAM GEOMETRY VERIFICATION OF 'ADDCHG' PROGRAM. THE PURPOSE OF THIS PROGRAM IS TO:
      (1) ADD'M' NODES TO THE STREAM GEOMETRY ('KGNSTRG') FILE WHEN THE ELEVATION BETWEEN THE UPSTREAM & DOWNSTREAM SUBREACH
     NODES WOULD OTHERWISE EXCEED 300 METERS;
      (2) CALCULATE THE AVERAGE LATITUDES & ELEVATIONS FOR THE REACH;
      (3) CALCULATE THE STREAM GRADIENT & STREAMBED TEMPERATURE;
      (4) CREATE THE UNFORMATTED 'KSTRMGM' FILE.
THIS VERIFICATION IS THE FORMATTED VERSION OF 'KSTRMGM'.

NORMAL COMPLETION OF 'ADDHYD'.

```
****************************************** TABLE IV: HYDROLOGY WITH MISSING FLOWS ADDED ******************************************
    BEGIN HYDROLOGY VERIFICATION OF 'HYDFIL' PROGRAM. THE PURPOSE OF THIS PROGRAM IS:
       (1) FILL IN IS HISTORICAL FLOWS WITH A 'BEST' ESTIMATE BASED ON AVAILABLE DATA;
       (2) FLAG ANY MISSING, BUT NECESSARY, INITIAL WATER TEMPERATURES WITH A '-1.';
       (3) FILL IN ANY MISSING LATERAL INFLOW WATER TEMPERATURES WITH THE LOCAL MEAN ANNUAL AIR TEMPERATURES;
       (4) CREATE THE UNFORMATTED 'KHYDR2&3' FILES.
 THIS VERIFICATION IS A FORMATTED VERSIONOF THE 'KHYDR4' FILE.

****************************************** TABLE V: HYDROLOGY WITH LATERAL FLOWS ADDED ******************************************
    BEGIN HYDROLOGY VERIFICATION OF 'LATFLO' PROGRAM. THE PURPOSE OF THIS PROGRAM IS:
       (1) COMPUTE LATERAL FLOWS FOR UPSTREAM NODES;
       (2) CREATE THE FINAL UNFORMATTED HYDROLOGY FILE.
 THIS VERIFICATION IS A FORMATTED VERSION OF THE 'KHYDR5' OR 'KHYDROL' FILE.

************************************ TABLE VI: COMPOSITE-STR. GEOM., HYDR., & MET. MERGED ************************************
    BEGIN FINAL HYDROLOGY, STREAM GEOMETRY, ANDLOCAL METEOROLOGY VERIFICATION FOR THE COMPOSITE NETWORK. THE PURPOSE OF
 THIS PROGRAM IS TO:
       (1) GENERATE THE SOLAR DATA;
       (2) GENERATE THE SHADE DATA;
       (3) DETERMINE THE LOCAL METEOROLOGY FOR EACH NODE;
       (4) COMPLETE THE HYDROLOGY DATA AT EACH NON-HYDROLOGY NODE;
       (5) MERGE ALL DATA AT EACH COMPOSITE NODE FOR ALL YEARS AND TIME PERIODS INTO A SINGLE DIRECT-ACCESS FILE.
 THIS VERIFICATION IS A TRUNCATED VERSION CONTAININGTHE NEWLY CREATED DATA FOR 'KMERGE'.

NORMAL COMPLETION OF 'METROL'.

```
****************************************** TABLE VIII: WATER TEMPERATURE DATA ******************************************
    BEGIN INSTREAM WATER TEMPERATURE CALCULATIONS VERIFICATION OF 'NETWRK' PROGRAM. THE PURPOSE OF THIS PROGRAM IS TO:
       (1) DETERMINE THE PREDICTED WATER TEMPERATURE FOR EACH YEAR & TIME PERIOD AT EVERY NODE IN THE COMPOSITE NETWORK;
       (2) GENERATE THE VERIFICATION TABLE;
       (3) GENERATE THE UNFORMATTED OUTPUT FILE FOR THE OUTPUT REPORT GENERATOR AND/OR LINKAGE TO OTHER PROGRAMS.
 THIS VERIFICATION IS THE FORMATTED VERSION OF 'KTRNSPT' FILE.
